128 pin TQFP socket/28 pin DIP 0.6" plug

Supported Device/Footprints

Using this adapter several 128 pin Lattice devices in TQFP packages can be programmed on 28 pin DIP programmers.

This socket will only work for the TQFP package.

The PQFP package has a different lead pitch.

Adapter Dimensions

Adapter Construction

The adapter is made up of 3 sub-assemblies. They assemble via connectors making the adapter modular. This way the sub-assemblies can be replaced when they wear out.

When disassembling the adapter take care not to bend the pins. When reassembling the adapter note the pin 1 indicators to align the parts correctly.

1048T128

Performs the wiring shown in the adapter wiring section, and carries the following test socket:

Lidded TQFP socket:

Enplas Part #: FPQ-128-0.4-01A LSC #: 128QK-01A

28-170

Connects to the top board and provides the 28 pin DIP plug.

Adapter Wiring

The following chart shows the connections from the TQFP device to the adapter's DIP plug.

** indicates signals with 2K ohm series resistor.
VCC to GND has a 0.1uF, & a 0.01uF capacitor.
/ispEN to GND has a 0.1uF capacitor.
